

Incompatible Dangerous Goods

Packages containing dangerous goods that might react dangerously with each other must not be stowed in a position that would allow interaction in the case of leakage. Incompatible dangerous goods must be segregated as stated in Table 9.3.A from the IATA DGR (below).

Remember that Division 4.1 and Classes 6, 7 and 9 are not included in Table 9.3.A because they do not require segregation. Only primary hazards are considered in these situations.

Explosives may be stowed together in some situations. Their compatibility group determines this.

The aim of the table is to allow us to determine if two classes of dangerous goods are safe to be loaded together.

Segregation of packages containing dangerous goods

Table 9.3.A
Segregation of Packages (IATA DGR 9.3.2)

Hazard Label										
		1 excluding 1.4S	1.4S	2	3	4.2	4.3	5.1	5.2	8
	1 excluding 1.4S	Note 1	Note 2	X	X	X	X	X	X	X
	1.4S	Note 2	—	—	—	—	—	—	—	—
	2	X	—	—	—	—	—	—	—	—
	3	X	—	—	—	—	X	—	—	—
	4.2	X	—	—	—	—	X	—	—	—
	4.3	X	—	—	—	—	—	—	X	—
	5.1	X	—	—	X	X	—	—	—	—
	5.2	X	—	—	—	—	—	—	—	—
	8	X	—	—	—	—	X	—	—	—
<p>Notes: (Notes 1 & 2 listed above, refer IATA Dangerous Goods Regulations 9.2.2.2 & 9.3.2.2.4)</p> <p>1. An "x" at the intersection of a row and a column indicates that packages containing these classes/division of dangerous goods must be segregated. A "-" at the intersection of a row and a column indicates that packages containing these classes/divisions of dangerous goods do not require segregation.</p> <p>2. Division 4.1 and Classes 6, 7 & 9 are not included in Table 9.3.A as they do not require segregation from any other class or division.</p>
